Aska Hand-Held + Backpack - 9L

EN3-7 Standard

DIN1866 Standard

Aska Trolley Mounted - 50L

## The Problem

We are modernizing equipments, buying latest gadgets, weapons but to protect our valuable assets (Office Buildings, MT Section, Storage Depots, Ammunition Depots, Data / Record rooms, FSL Labs) and valuable human life we still rely on vintage extinguishers. Whenever we see a short circuit fire we are helpless and confused which extinguisher to be used and these extinguishers have to be maintained regularly and there is minimum fire performance / rating of dowsing fire. Lancing distance is also very less and there is no control discharge. For refilling also we need to send them outside and bear the cost.

## The Solution

Aska High Pressure Water Mist & CAFS is a perfect solution to this problem which assures maximum fire rating of A68, B233, E1000V with a control discharge and light weight gun of 750 grams approx. The lancing distance is 12-15 meters and is applicable on all three classes of fire (Class A, Class B & Live Electrical / Short Circuit fires). This is available in 10L as backpack mounted and 50L capacity in trolley mounted on **GEM**. These systems can also be used during riot control situation effectively to dowsing bus or tyre fire. In house refilling is possible and training is given for the same. Its an effective first responder.
