

SECURITY FOR life PROTECTION

SOFTWARE APP

The Aska Software family is the ideal link between the gauges and the hub, since it ensures a perfect installation and monitoring of the devices.

The technology allows the connectivity of the elements to interact remotely, gaining efficiency and security, reducing costs and monitoring the connected elements in real time.

IoT for monitoring in real time.

The APP allows a simple and effective installation of the fire extinguishing elements to be controlled.

The Software with access from any device, (Mobile, Tablet, PC), through its user name and password, allows monitoring the fire extinguishing system in real time.
