Aska Hand-Held + Backpack - 9L

EN3-7 Standard

DIN1866 Standard

Aska Trolley Mounted - 50L

Aska Fire Fighting Motor Bike For
Rapid Response (The Blaze Buster)
Carrying 2 x 9L

The Problem

Whenever we see a short circuit fire we are helpless and confused which extinguisher to be used and these extinguishers have to be maintained regularly and there is minimum fire performance / rating of dowsing fire. Lancing distance is also very less.

For refilling also we need to send them outside and bear the cost. Further everybody is helpless to see crores of rupees damage and wait for the fire tender to arrive, the fire tender dowses the fire but does lot of collateral damage by flooding of excessive water.

We have parking lots, genset, record rooms and most important is the valuable human life and data which cannot be recovered in case of fire.

The Solution

High Pressure Water Mist & CAFS is an effective first responder as it assures maximum fire rating of A55, B233, E1000V with control discharge and light weight gun of 750 grams approx. The lancing distance is 14 meters and is applicable on all three classes of fire (Class A, Class B & Live Electrical / Short Circuit Fires).
