Aska Hand-Held + Backpack - 9L

EN3-7 Standard

DIN1866 Standard

Aska Trolley Mounted - 50L

Aska Fire Fighting Motor Bike For
Rapid Response (The Blaze Buster)
Carrying 2 x 9L

The Problem

We are modernizing equipments, buying latest gadgets, weapons but to protect our valuable assets (Office Buildings, MT Section, Storage Depots, Ammunition Depots, FSL Labs) and valuable human life we still rely on vintage extinguishers. Whenever we see a short circuit fire we are helpless and confused which extinguisher to be used. Lancing distance is also very less and mostly there is no control discharge with conventional fire extinguisher. For refilling also we need to send them outside and bear the cost. We don't know what is the quality of refill also.

The Solution

Aska High Pressure Water Mist & CAFS is a perfect solution to this problem which assures maximum fire rating of A55, B233, E1000V with a control discharge and light weight gun of 750 grams approx. The lancing distance is 14 meters and is applicable on all three classes of fire (Class A, Class B & Live Electrical / Short Circuit fires). This is available in 9L as backpack mounted and 50L capacity in trolley mounted on GEM. These systems can also be used during riot control situation effectively to douse fire. In house refilling is possible and training is given for the same. Its an effective and proven first responder.
